Core Concepts: OOP, Data Structures & Algorithms, Database Management Systems

LANGUAGES

Urdu – Fluent

Punjabi – Native

English – Intermediate

PROFILE

Motivated Software Engineering student pursuing a Bachelor of Science in Software Engineering at the National University of Modern Languages (NUML), Faisalabad Campus, with a CGPA of 3.52/4.00. Strong academic foundation in Object-Oriented Programming, Data Structures and Algorithms, Database Systems, Software Engineering, Software Requirements Engineering, System Analysis and Design, and Front-End Development. Hands-on experience developing academic software projects. Interested in software development, problem-solving, and building practical solutions while continuously improving technical skills.

ACADEMIC PROJECTS

Freelancer & Client Management System

- Developed a web-based system using HTML, CSS, SQL, and relational database concepts to manage freelancers, clients, and projects.
- Designed database structure using ERD/EERD, normalization, queries, and constraints.

Library Management System

- Prepared a structured Software Requirements Specification (SRS) covering functional and non-functional requirements.
- Developed system models and requirements documentation to define system functionality and user needs.

Custom Craft

- Developed a customized craft business concept based on customer preferences and market needs.
- Applied business model development, market analysis, value proposition, and marketing strategy.

ACHIEVEMENTS

Front-End Developer Professional Certificate Meta | Coursera

- HTML, CSS, JavaScript & Responsive Design

DigiSkills Pakistan – IT & Digital Skills

- Earned professional course certifications in IT and digital skills through online learning and self-development.
